The next Donaldson Run Civic Association meeting is
Wednesday, November 9 at Taylor Elementary at 7:30 p.m.
A social half hour starts at 7 p.m.
first phase of the NC project, Tributary A, was completed in 2006. The second phase, Tributary B, will span from Upton Street to the point where the stream meets Tributary A in Zachary Taylor Park. Staff will also describe the County’s efforts to update the contours of the Resource Protection Area that forms the basis for the County’s Chesapeake Bay Preservation Ordinance.

We’d like to hear from you, either at our meeting or by e-mail, about any issues that you would like us to focus on or look into, or ideas you may have about how to make DRCA a more effective forum for your concerns and for getting to know each other better. Among the topics of interest to our members over the past several years have been the County’s plans for the Lee Highway corridor, the new Stratford Middle School, Fire Station 8, and the current mulch pile/salt dome site at 26th Street and Old Dominion; the new Saturday morning farmers’ market at Marymount University; the County’s liaison with the FAA on airport noise; the future of Potomac Overlook Regional Park; traffic issues; and additional NC projects.

DONALDSON RUN STREAM RESTORATION AND UPDATE ON COUNTY’S RESOURCE PROTECTION MAP ARE ON AGENDA FOR NOVEMBER MEETING

Anne Wilson

County staff from the Office of Sustainability and Environmental Management will provide an update on the status of the Donaldson Run Tributary B restoration project during the November 9th meeting. Planning for the restoration of Tributary B has been ongoing since 2004 and construction is anticipated to begin in the fall of 2017. This will likely be a challenging stream restoration project to construct due to the location of private property boundaries, steep slopes and an elevation change of 44’ from the top to the bottom of the stream reach. The trail will be closed during construction to protect public safety in the extremely narrow construction area. The status of the Tributary B restoration project and a synopsis of previous presentations are available online at http://projects.arlingtonva.us/projects/donaldson-run-stream-restoration-tributary-b/.

County staff will also provide an overview of the process to update the County’s Resource Protection Area map. This map depicts the location of Resource Protection Areas, or areas near streams and wetlands, in Arlington. Periodic updates must be made to the map to comply with state law and the County’s Chesapeake Bay Preservation Ordinance.
COUNTY BOARD APPROVES OLD DOMINION ACCESS ROAD AT STRATFORD
Anne Wilson

Planning for Stratford Middle School continued during the summer, and the use permit for the project is expected to be submitted to the County Board this fall. Following over a year of discussion and analysis, in May the County Board approved the construction of an access drive to Old Dominion. This element of the plan is important for safety in an area that will become more active when 1,000 middle school students converge when the school opens in the fall of 2019. DRCA worked closely with neighbors, county, and school officials on this issue, and believes that the best option to manage transportation was achieved. When the middle school opens, DRCA hopes that nearby students will feel safe walking and biking to school.

FIRE STATION 8
Anne Wilson

As reported in the local press in July, the County Board approved a plan to rebuild Fire Station 8 at its current location on Lee Highway rather than move it to the parcel of land at 26th St and Old Dominion, known as Old Dominion Green. The Board followed the recommendation of the Fire Station Task Force that was established to study the many factors involved in siting the new station. Arrangements will need to be made for a temporary fire station to fill in while the new station is being constructed. County staff is in the process of evaluating possible locations for the temporary fire station, and it is expected that the options will be submitted to the County Board before the end of this year.

The future of the current salt dome and planning for the Old Dominion Green site are undetermined at this time. The use of this area is one of a number of county initiatives that will require comprehensive planning. To assist with this, the County will establish a new Joint Facilities Advisory Commission (JFAC). The draft mission of this group is to “provide input to the Boards on capital facilities needs assessment and capital improvement plans…” for both county and schools. In short, this group will match needs with siting and engage the wider community as plans and decisions are considered. The details of this new commission are still being refined, and the County Board is expected to finalize the commission in December. To learn more, including opportunities for public input regarding this new commission, go to: http://arlington.granicus.com/MetaViewer.php?view_id=2&clip_id=3216&meta_id=149587. DRCA will continue to monitor the situation with Old Dominion Green and will keep the neighborhood apprised.

REAGAN NATIONAL AIRPORT (DCA) NOISE AFFECTING DONALDSO RUN NEIGHBORHOOD
Charlie Henkin

Summary. A long-standing and increasingly irksome element of life in the DRCA area is the increase in noise from flights arriving at and departing from DCA. This has led to community engagement with the FAA authorities and airlines responsible for the increase. This article summarizes the conditions causing the increase, the County Board letter to the FAA expressing dismay that adequate study and communication with citizens under the flight paths was not undertaken, the steps being taken to mitigate the problem, and the sources of information available to the reader who wishes to learn more. Of note, the DRCA is not alone in experiencing increased noise, and in some cases mitigating our noise will increase the noise affecting others in Arlington and elsewhere. Balancing the conflicting interests will be a challenge, but the current FAA and airline plans point to some relief for our neighborhood within perhaps the next two years.

On September 13 an FAA “local public workshop” was held at Washington-Lee High School and provided an excellent opportunity for County Board members (Ms. Garvey, Ms. Cristol, and Mr. Vihstadt), other concerned citizens, FAA officials, airline representatives (American Airlines was represented) and real estate developers to exchange views and record concerns or conclusions. This article is based in part on information gleaned at this event. Other events have been and will be conducted, and these are/will be depicted on the Reagan National Community Noise Working Group web site at http://www.flyreagan.com/dca/community-working-group

(continued on page 4)
AIRPORT NOISE
(continued from page 3)

This web site also contains numerous FAA studies of particular DCA issues.

Why more noise?

The underlying factor is the demand by customers for more long distance flights into/out of DCA. The airport is a victim of its own success by reason of its upgraded terminals, proximity to DC, and Metro service. Although the number of slots allocated to airlines has not been increasing, the number of slots used by airlines for bigger airplanes with more seating capacity, which generate more noise, has increased. And the most popular times for these flights also tend to be in the morning and evening, precisely when most of us are home and seeking some quiet in our lives.

Another factor in recent years has been the low price of McDonnell Douglas MD80 class aircraft, which are by far the noisiest aircraft permitted under old rules for airport noise mitigation. A number of airlines bought or leased these aircraft by virtue of economics. They are pretty much obsolete now in several respects, including seating and customer satisfaction and fuel usage – in addition to noise. Their retirement from use at DCA would be highly beneficial for our purposes.

Finally, the introduction of the NEXTGEN air traffic control system, which utilizes the more accurate GPS satellite-based (as opposed to only radar) navigation, has allowed for more concentrated flight paths without the danger of aircraft approaching each other too closely for safe and effective control. Paradoxically, although this should ultimately allow for aircraft to fly directly over the Potomac – and further from our neighborhoods- NEXTGEN currently has resulted in a concentration of flights somewhat off this ideal path and often over Arlington. Until the airline pilots and aircraft have been fully certified for the more Potomac-centric paths, and these paths have been vetted with all the communities and other stakeholders, FAA cannot adopt them.

Adoption of the new paths may well benefit our neighborhood, although Rosslyn, for example, might experience more flights than currently. The net benefit across the County is thus not foreordained. In Ms. Garvey’s September 12 letter to the FAA she notes that “The stated goal of this effort has been to “maximize flight time over the Potomac River and minimize flight time over residential areas.” We have seen from experience that both the size and meandering nature of the Potomac River make it impossible for most aircraft to remain exclusively over the River itself, particularly on northern departure. We know that there is no perfect solution and that community overflights in our region are a part of our reality moving forward. Therefore, we believe that for those individuals that find themselves under the flight path, particularly given the hours of operation that have been extended due to market conditions and the intensity and concentration, that additional steps must be taken.”

What steps are underway to mitigate noise?

- **Limiting slots.** Our Congressional delegation has been resisting requests for more slots at DCA, principally coming from Congressional districts in the Western US. This status quo will keep the situation from getting worse unless the airlines further expand the use of peak-hours, large aircraft flights within the allowed number of slots. So far, market conditions and the nature of the current heavy peak hours use does not presage such an expansion.

- **Retiring MD80s.** American Airlines, which represents over 50 percent of the flights at DCA, has already retired its MD80s. Delta, the next largest airline at DCA, responded to public pressure and agreed not to use MD80s before 7 AM and after 3 PM. Together, these two airlines account for over 80 percent of flights at DCA. Continued pressure to eliminate all MD80s at DCA could help. A broader regional and conceivably national effort to eliminate these aircraft from airports dealing with noise issues would also help level the playing field among the major airlines as they modernize their fleets (and help other jurisdictions affected by MD80 noise). This could avoid distortion of the economics among airlines that could result from pressuring Delta to eschew MD80s at DCA while other airlines that do not frequent DCA to the same degree would experience less financial impact.

- **Accelerating the adoption of a procedure for flying directly over the Potomac that actually will reduce noise over the DRCA area.** If such paths can in fact be devised and flown, adoption would seem to be feasible well within a couple of years, given continued focus and agreement among stakeholders. Not all stakeholders

(continued on page 5)
AIRPORT NOISE
(continued from page 4)

would prefer the same flight paths, as noted above, but delaying the revised paths will continue the status quo, which is unsatisfactory from a DRCA area noise perspective.

What can the reader do?
First, stay informed and involved. Metropolitan Washington Airport Authority provides residents with the phone number for their Noise Office (703-417-1204) and the link to the WebTrak system http://www.flyreagan.com/dca/reagan-national-submit-noise-complaint to find information on specific flights and to file a noise complaint.

Many WebTrak complaints are filed, and a substantial number of citizens have also taken the time to attend the local public workshops referred to above. This is where one can have a discussion with experts and get the best feeling for the state of play on the issues, as well as representing our concerns with other stakeholders and our County Board members. The County web page on the DCA noise issue is at:
https://departments.arlingtonva.us/cmo/airport-noise/

(A note - I understand that John Vihstadt is the liaison for the County Board on this issue since Libby Garvey is currently Board chair. The page when I last saw it stated otherwise.)

The County web page notes that Arlington County is represented on the Reagan National Airport Community Working Group by Mr. Stephen Geiger and Mr. Joseph Pelton (without their contact information) who were chosen by the Arlington County Board.

WRONG-WAY PARKING
Mike Green

A traffic rule that many drivers do not know is that it is a violation to park on public streets facing the "wrong way." What is facing the wrong way? When a vehicle is parked with the vehicle's left wheels next to the curb or edge of the roadway (except on one-way streets) it is parked facing the wrong way. Why does this rule exist? It is a clear indication that the driver who parked the vehicle violated another traffic rule (driving on the wrong side of the roadway) before parking – and will do so again when leaving the parking space. But more importantly, it is a matter of safety. The rule is designed to promote safe parking at night because the rear of a vehicle is required to have red reflectors to alert approaching drivers to the presence of a parked car. Facing the wrong way, without red reflectors on the front of the vehicle, poses a hazard to approaching vehicles.

Because cars in the United States have the driver on the left, it is more difficult for the driver to see if there are cars approaching when pulling out of the parking space on the wrong side of the road. Also, visitors to the area who are not familiar with the neighborhood can have a hard time figuring out whether the street is one way or two way. Finally, for children and bicyclists it can be a real hazard. When there are drivers violating the rules of the road and pulling into the wrong side of the street to park, which is not expected, serious injuries can occur.

The code sections for our area are reprinted below for any reader who is interested:

VIRGINIA Code § 46.2-889. Location of parked vehicles.

No vehicle shall be stopped except close to and parallel to the right edge of the curb or roadway, except that a vehicle may be stopped close to and parallel to the left curb or edge of the roadway on one-way streets or may be parked at an angle where permitted by the Commonwealth Transportation Board, the Department, or local authorities with respect to highways under their jurisdiction.

MARYLAND STATUTES AND CODES - Section §21-1004 - Additional parking regulations.

(a) Manner of parking generally. Except as otherwise provided in this section, a vehicle that is stopped or parked on a two-way roadway shall be stopped or parked parallel to the right hand curb or edge of the roadway, with its right hand wheels within 12 inches of that curb or edge of the roadway.

DISTRICT OF COLUMBIA Municipal Regulations 2400.1

No person shall stand or park a vehicle in a roadway other than parallel with the edge of the roadway headed in the direction of lawful traffic movement.

2400.2 - A person shall stand or park a vehicle on a two-way street with the right-hand wheels of the vehicle within twelve inches (12 in.) of the right curb or edge of the roadway.

MASTER GARDENERS HELP DESK

The Master Gardeners plant clinics at the Farmers' Markets and the Arlington Central Library have closed for the season, but our Help Desk operates year-round. We welcome your garden-related questions, including those related to plant and insect identification. The Help Desk operates from 9 a.m. to noon weekdays at the Virginia Cooperative Extension office, 3308 S. Stafford Street, in Arlington. Contact us at 703-228-6414 or mgarlalex@gmail.com, or drop by to speak with our Help Desk volunteers. It's best to call before you come to make sure we're available.

Also check out the resources on our website, mgnv.org. You'll find a Quick Guide for Gardeners in Northern Virginia, with our hardiness zone and frost dates; a list of problem plants and better alternatives; and an extensive list, with pictures and descriptions, of Tried and True Native Plants for the Mid-Atlantic area.

GULF BRANCH NATURE CENTER

Blacksmithing Campfire
Saturday, Nov. 5, 6 - 7pm
The whole family is invited to join us at the Gulf Branch fire ring for lots of old-fashioned fun. This engaging program will be filled with entertaining activities that may include stories, special animal guests, games, songs and of course, S'mores! For more information call 703-228-3403.
Families. Children must be accompanied by a registered adult. $5 fee per person; $20 max per family due at registration. Program #612856-F

To register call 703-228-4747 or go on-line to https://registration.arlingtonva.us
This is your neighborhood newsletter.  
See page 2 for Civic Association information.

Next DRCA Meeting  
Wednesday, November 9 at 7:30 p.m.  
Taylor Elementary School  
2600 North Stuart Street

\textbf{Agenda:}  
DONALDSON RUN STREAM RESTORATION, UPDATE ON COUNTY’S RESOURCE PROTECTION MAP, and CHRISTIAN DORSEY

A social half hour begins at 7 p.m.

**HIRE A NEIGHBOR!**

Many thanks to our neighborhood teens who are available for the jobs listed below. If you, or someone you know, are interested in providing a neighborhood service, email mary@drca.org.

**Babysitting**  
Toby Heidrich, 15 y.o., 703-517-5449

**Dog Walking & Pet Care**  
Quinn Cooper, 13 y.o., 703-469-2242

**Raking/Snow Shoveling**  
Ned Cooper, 15 y.o., 703-469-2242

**Tennis Lessons for Kids/Adults (Any Level)**  
Tate and Chase Arevalo, 17 and 15 years old, 703-371-3155

**DRCA MEMBERSHIP**

\textit{Maxine Nagel}

Take a moment to check the mailing label above. If your dues are current, your label will be marked accordingly. If they are not, now is the time to renew your membership!

Renew now, for the low cost of $15 per household, and your membership will be in good standing through the end of 2017. Checks can be made payable to DRCA and directed to DRCA Treasurer Maxine Nagel at 2900 North Stafford Street, 22207. Better yet, bring your dues to our next general membership meeting on Wednesday, November 9, at Taylor Elementary School.

If you are receiving this newsletter electronically, and if your membership is not current, you recently should have received an email advising you of your status. That being said, if you have questions regarding your membership, please contact me at Maxine@drca.org.
